

Rush Headset

Stereo gaming headset

We are proud to announce a new addition to our Rush series!

In addition to the other products, the Rush Board, Rush Pad, Rush Mouse, Rush Case and Rush Mat, the Rush Headset now joins our well-known family of products.

The compact and shapely Stereo Headset bares a strong resemblance to its family. The same orange colour accents, the catchy logo and the imprinted silver styling as well as the outstanding performance and solid manufacturing quality.

The headset connects quickly and easily to a favourite audio source via 3.5 mm (1/8 inch) jack. The volume control is integrated directly in the cable. Fleecy, velvety ear cushions are extremely comfortable even for long gaming sessions, and the included carrying bag is ideal for transporting the headset to LAN parties and other social functions.

Our Rush Headset is not just for gamers, as it also functions perfectly for voice (VoIP) and multimedia applications.
